How the chart maps to needlepoint canvas

Each chart square tells you which woven crossing to paint.

Chart square

Painted crossing

One chart square = one painted canvas crossing

- Paint the horizontal and vertical strands where they cross.
- Keep the surrounding needle holes open.
- Find the canvas center before transferring the design.
- Use the five- and ten-stitch guides to count short sections.
- An odd stitch count has a center intersection.
- An even stitch count has a center between intersections.
- Test paint on scrap canvas.
- Work one color or nearby section at a time.
- Mark completed squares on the printed chart.
- A letter on white means intentional white paint.
- No letter or paint mark means bare canvas.
